## Interests at a Glance

I study a variety of fluid and plasma instabilities, particularly how they saturate, drive turbulence, and affect mixing, and I work to capture these details in reduced models that I check against numerical simulations. This involves code development, running massively parallelizable simulations and analyzing the results, and applying a variety of mathematical methods to model complex physical systems.

## Affiliations and Education

2020–Present	<b>University of California, Santa Cruz</b> Postdoc, Applied Mathematics PI: Pascale Garaud
2014–2020	<b>University of Wisconsin-Madison</b> Ph.D., Physics (Plasma) Advisors: Paul W. Terry, Ellen G. Zweibel Graduation date: Aug 23, 2020
2010–2014	<b>University of Oregon</b> B.S., Physics (with honors), Mathematics

## Honors, Awards, and Scholarships

2021	<b>Outstanding Postdoc Spotlight</b> , UCSC press release ( <a href="https://engineering.ucsc.edu/news/outstanding-postdoc-adrian-fraser">https://engineering.ucsc.edu/news/outstanding-postdoc-adrian-fraser</a> )
2019	<b>Karl Guthe Jansky &amp; Alice Knapp Jansky Fellowship for Physics &amp; Astronomy</b> , University of Wisconsin-Madison, Department of Physics <i>Annual award given to outstanding graduate student in Physics or Astronomy</i> ( <a href="http://www.physics.wisc.edu/awards">http://www.physics.wisc.edu/awards</a> )
2018	<b>Exceptional Service Award</b> , University of Wisconsin-Madison <i>Campus-wide TA award, nominated by the Physics department</i> ( <a href="https://grad.wisc.edu/teaching-assistant-awards/">https://grad.wisc.edu/teaching-assistant-awards/</a> )
2017	<b>Student Poster Prize</b> , Sherwood Fusion Theory Conference ( <a href="http://www.sherwoodtheory.org/sw2018/poster_awards.php">http://www.sherwoodtheory.org/sw2018/poster_awards.php</a> )
2015	<b>Piore Award</b> , University of Wisconsin-Madison, Department of Physics <i>Annual award given for academic achievement in early stage of the Ph.D. program</i> ( <a href="http://www.physics.wisc.edu/awards">http://www.physics.wisc.edu/awards</a> )
2014	<b>Van Vleck Fellowship</b> , University of Wisconsin-Madison, Department of Physics <i>Awarded to incoming Ph.D. students with outstanding undergraduate records</i> ( <a href="http://www.physics.wisc.edu/awards">http://www.physics.wisc.edu/awards</a> )
2013	<b>Weiser Undergraduate Teaching Award</b> , University of Oregon, Department of Physics
2013	<b>Science Literacy Program Scholar</b> , University of Oregon <i>Co-instructed PHYS 155, a special topics elective for non-physics majors</i> ( <a href="https://scilit.uoregon.edu/">https://scilit.uoregon.edu/</a> )
2011	<b>Dean's List</b> , University of Oregon ( <a href="https://advising.uoregon.edu/content/academic-honors">https://advising.uoregon.edu/content/academic-honors</a> )
2010-2013	<b>Scholarships for Oregon Scientists</b> , University of Oregon ( <a href="https://sciencescholars.uoregon.edu/">https://sciencescholars.uoregon.edu/</a> )

## Successful Computing Allocation Requests (Co-) Authored

2021	<b>Momentum transport by shear-flow-driven turbulence in stars</b> , XSEDE computing resources, NSF (education allocation) Resources awarded: approx. 200,000 CPU-hours PI: <b>A.E. Fraser</b>
2018-2019	<b>Role of Stable Eigenmodes in Shear-flow MHD Turbulence</b> , XSEDE computing resources, NSF (start-up allocation) <b>Lead author on proposal</b> , but not listed as PI due to XSEDE policy Resources awarded: approx. 200,000 CPU-hours PI: P.W. Terry, Co-PIs: <b>A.E. Fraser</b> , M.J. Pueschel, E.G. Zweibel
2017-2018 & 2018-2019	<b>Gyrokinetic Plasma Microturbulence Simulation in Fusion and Basic Plasmas</b> , XSEDE computing resources, NSF (research allocation) Contributed to proposal, but the lead author was the PI Resources awarded: approx. 6,750,000 (2018-2019) & 11,300,000 (2017-2018) CPU-hours PI: M.J. Pueschel, Co-PIs: <b>A.E. Fraser</b> , P.W. Terry, Z.R. Williams, S.-W. Tsao

## Invited Talks

Mar 2021	“Capturing negative turbulent viscosity in reduced models of unstable shear flows” - ‘Staircase21’ KITP meeting
Oct 2019	“Saturation of Shear-flow Turbulence in Magnetized Plasmas” - American Physical Society Division of Plasma Physics Meeting, Fort Lauderdale, Florida
Apr 2019	“Role of Stable Modes in the Saturation and Transport Properties of Shear Flow Turbulence” - Sherwood Fusion Theory Conference, Princeton, New Jersey

## Seminars

Nov 2021	“Fingering convection in MHD: problems with parasites, and speculative solutions” - University of Leeds, Fluids and MHD Seminar ( <a href="#">Youtube link</a> )
Jun 2021	“MHD effects on thermohaline mixing in stars: the problem with parasites” - UW-Madison Astronomy, Monday Science Seminar series
Jun 2021	“MHD effects on thermohaline mixing in stars: the problem with parasites” - <a href="#">Kavli Summer Program in Astrophysics</a>
Apr 2021	“MHD effects on thermohaline mixing in stars: the problem with parasites” - Flatiron Institute CCA, Stars & Compact Objects group meeting
Oct 2020	“Momentum transport, dissipation, and models built from linear modes in MHD shear flows” - Astronomy Seminar, Stony Brook University
Mar 2019	“Role of Stable Modes in Shear-Flow Turbulence” - Plasma Physics Seminar, University of Maryland
Oct 2018	“Role of Stable Eigenmodes in Kelvin-Helmholtz Turbulence” - Plasma Seminar, IFS, University of Texas at Austin

## Contributed Presentations

Nov 2021	KITP Conference: Transport in Stellar Interiors, Santa Barbara, CA – contributed oral ( <a href="#">link</a> )
Nov 2021	American Physical Society Division of Fluid Dynamics Meeting, Phoenix, AZ – contributed oral
Nov 2021	American Physical Society Division of Plasma Physics Meeting, Pittsburg, PA – poster presentation
Nov 2020	American Physical Society Division of Plasma Physics Meeting, remote – poster presentation
Apr 2020	Sherwood Fusion Theory Conference, Santa Rosa, CA – poster presentation ( <i>meeting canceled</i> )
Nov 2018	American Physical Society Division of Plasma Physics Meeting, Portland, Oregon – poster presentation
Apr 2018	Sherwood Fusion Theory Conference, Auburn, Alabama – poster presentation
Oct 2017	American Physical Society Division of Plasma Physics Meeting, Milwaukee, Wisconsin – poster presentation
May 2017	Sherwood Fusion Theory Conference, Annapolis, Maryland – poster presentation
Oct 2016	American Physical Society Division of Plasma Physics Meeting, San Jose, California – poster presentation
Apr 2016	Sherwood Fusion Theory Conference, Madison, Wisconsin – poster presentation

## Teaching Experience

2014-2017	Teaching Assistant, Introductory Physics I & II for Life Sciences, UW <i>Taught four semesters total; granted ratings of “Excellent” three times and “Very Good” once by TA coordinator; granted campus-wide TA award in 2018</i>
2010-2014	Co-instructor, instructional lab manager, Undergraduate Teaching Assistant, tutor, mentor, and peer advisor at UO and a local high school <i>The teaching activities I was involved in at UO were broad and occurred over the span of my time there; I am happy to discuss them in greater detail if asked</i>

## Mentoring

2022-	Co-mentoring UCSC undergraduate student Henry Olling, alongside Prof. Patrick Chuang, on research project on water droplet accumulation in turbulent clouds
2021-	As a senior participant at the Kavli Summer Program in Astrophysics 2021 ( <a href="#">link</a> ), directly supervised Kavli student fellow Imogen Cresswell’s research project on shear-flow turbulence in MHD, motivated by small-scale dynamics in stellar interiors - <i>Met daily for five weeks, and weekly thereafter, to discuss research progress and review concepts involving shear-flow instabilities and turbulence</i> - <i>Simulations performed using XSEDE resources I procured</i>
2021-	Mentoring UCSC undergraduate student Amishi Sanghi on research project, publication in prep.
2019-2020	Peer mentor to Bindesh Tripathi, UW-Madison ( <i>I continue to mentor Bindesh on research</i> )
2019-2020	Supervised an undergraduate research project: Jack Schroeder, studying how magnetic fields affect coupling to large-scale stable modes in shear flow instabilities - <i>Met weekly to discuss progress in his calculation and review underlying concepts</i>

## Professional Service

2018-2019	Co-founder and President, Physics Graduate Student Council (PGSC) - <i>Led department-wide town halls to collaboratively form PGSC, served as president for its first year</i> - <i>Worked with department administrators and peers on two \$1,000 professional development <b>grants</b> awarded by the university with which we hosted seminar speakers; secured additional \$4,000 in support from the department for our first year</i> - <i>Worked with department and peers to: restructure graduate student recruitment and orientation; address major concerns regarding the graduate program; secure graduate student representatives on relevant faculty committees; implement peer mentoring</i> ( <a href="https://pgsc.physics.wisc.edu/">https://pgsc.physics.wisc.edu/</a> )
2018-2019	Graduate Program Committee Member, UW-Madison Department of Physics <i>Served as student representative on faculty committee</i> ( <a href="https://www.physics.wisc.edu/resources/committee">https://www.physics.wisc.edu/resources/committee</a> )

Peer reviews: J. Plasma Phys. (2020-present); NSF ad-hoc proposal review (plasma physics, 2022)

Session chair: KITP “transtar21” conference ([link](#))

Open-source software contributions: contributed to Dedalus (1 PR, 1 issue) and Eigentools (1 issue), see [my GitHub](#)

## Ongoing External Collaborations

- |       |   |
|-------|---|
| 2021- | <b>A.E. Fraser</b> , J.S. Oishi, and A.K. Kaminski, <i>Nonmodal growth of MHD shear flows with stabilizing magnetic fields</i> , contributed poster to APS DPP 2021; progress shared openly on <a href="#">GitHub</a>   |
| 2021- | I.G. Cresswell, <b>A.E. Fraser</b> , and P. Garaud, <i>Mixing in unstable shear flows with strong magnetic fields and high resistivity</i> , KSPA report <a href="#">available online</a> , journal publication next step   |
| 2020- | B. Tripathi, <b>A.E. Fraser</b> , P.W. Terry, E.G. Zweibel, and M.J. Pueschel, <i>Stable-mode-mediated turbulence saturation and small-scale dissipation in MHD Kelvin-Helmholtz-unstable flows</i> , contributed abstracts to <a href="#">Sherwood Fusion Theory 2021</a> & 2022 and APS DPP 2020 & 2021 |
| 2022- | B. Tripathi, <b>A.E. Fraser</b> , P.W. Terry, E.G. Zweibel, M.J. Pueschel, and E.H. Anders, <i>MHD shear-flow turbulence and stable mode excitation in the generalized quasi-linear approximation</i>   |
| 2021- | Z.R. Williams, J.C. Timperman, M.S. Dickerson, and <b>A.E. Fraser</b> , <i>Investigating the role of stable eigenmodes in the nonlinear dynamics of resistive tearing instabilities</i> , contributed abstract to APS DPP 2021  |

## Other Experience

- |             |   |
|-------------|---|
| Fall 2021   | Participant in KITP Program: Probes of Transport in Stars   |
| Summer 2021 | Participant in Kavli Summer Program in Astrophysics (KSPA): Fluid Dynamics of the Sun and Stars   |
| Spring 2021 | Participant in KITP Program: Layering in Atmospheres, Oceans and Plasmas  |
| Summer 2017 | Student in Summer School on Astrophysical Plasmas - Niels Bohr International Academy, Copenhagen, Denmark   |
| 2013–2014   | Imamura Group, University of Oregon<br><i>Worked on analytical and numerical models of accretion disks, including global fluid simulations, linear stability analyses, and radiation transport models</i>   |
| 2011–2013   | Torrence Group, University of Oregon<br><i>Using Geant4, a Monte Carlo-based particle physics software package, developed and ran a model to test the performance of an electron energy spectrometer originally proposed for use in the International Linear Collider</i> |

## Refereed Publications

(Red text highlights undergraduate and/or graduate students I mentored on these projects.)
